Webito Infotech   Surat, India
Completed a full stack development internship at Webito, working on MERN stack-based web applications.

Projects

HealWithPhysio 🔗   08/2024 – 03/2025
A user-friendly platform built with Flutter and PHP that connects patients with certified physiotherapists for in-home care. It enables easy search, profile viewing, and appointment booking, offering personalized treatment with seamless functionality.

Hotel Booking Analysis 🔗   11/2024 – 12/2024
This project analyzes a Booking.com 🔗 dataset containing details like booking lead times, room types, and customer preferences.It 🔗 provides insights using features such as booking channels, special requests, and reservation statuses.

Vehicle Break Down System 🔗   01/2024 – 03/2024
The project entails creating an on-road vehicle breakdown website. It will offer users the ability to request prompt assistance, track their service progress, and access support services. With real time tracking of assistance vehicles, integrated payment gateways, and a comprehensive service history and feedback system.

Achievements

Data Visualization Certificate by AlmaBetter 🔗
Gain practical knowledge of Data Visulization libraries for real world datasets.
